

DEBIT CARD CONTROLS

Complete control
wherever you go.

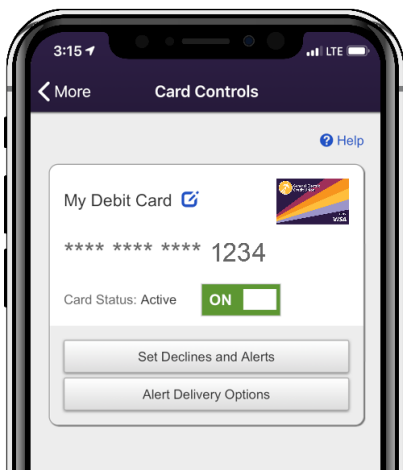

With Debit Card Controls, you can control when, where, and how your debit card can be used, with the flip of a switch in [Online Banking](#) and our [mobile app](#).

What are Debit Card Controls?

Debit Card Controls allow you to manage your debit card in real-time from your phone or computer. With the swipe of a finger or click of a mouse, you can: disable the card if it's lost, set transaction limits to help stay on budget, block the card from foreign transactions, and customize alerts so you're always in the know.

- **Instantly turn your card on/off.**
Disable your debit card when it's not in use or has been misplaced. When you want to use it or find it, enable it again just as easily.
- **Block international charges.**
Limit your debit card to U.S. purchases only. *Traveling overseas?* Simply flip the switch to allow transactions abroad.
- **Set spending limits.**
Trying to maintain a budget? Prevent overspending by creating spending thresholds.
- **Establish where you shop.**
Set the types of merchants you want to use, such as grocery stores and gas stations, and disable the others.
- **Customize how you shop.**
If you aren't interested in shopping online or making payments by phone, disable those options. It's easy to switch back if you change your mind.
- **Set alerts.**
Decide how and when you want to be notified. *Push notifications, text, email?* The choice is yours.

How do I get started?

- Within Online Banking, hover over **Additional Services** and select **Card Controls**.
- Apple® Users: Log in to the GECU mobile app and tap **More** at the bottom of the screen and select **Card Controls**.
- Android™ Users: Log in to the GECU mobile app and tap the **Menu** icon at the top of the screen and select **Card Controls**.

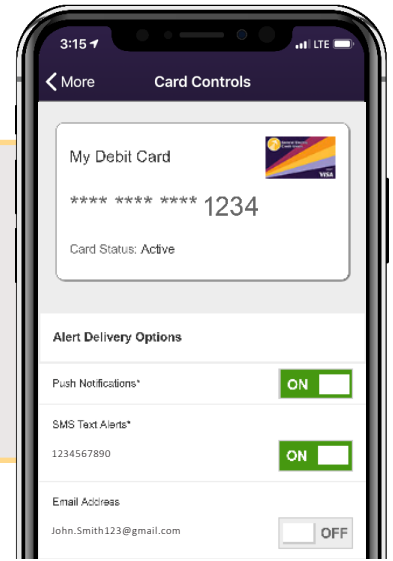

**General Electric
Credit Union**

How do I customize alerts?

From the Card Controls home screen, select **Alert Delivery Options**, then:

- Instantly turn: push notifications, text alerts, or email address alerts on/off with the flip of a switch.
- When the alerts are on, the switch will be green; when turned off, the switch will be gray.

How do I customize merchant categories and transaction types?

From the Card Controls home screen, select **Set Declines and Alerts**, then:

- Merchant Categories:
 - Select **Merchant Type**.
 - Tap the merchant category you wish to decline and flip the switch to the ON position.
- Transaction Types:
 - Select **Transaction Type**.
 - Tap the transaction type you wish to decline and flip the switch to the ON position.

How do I decline international charges?

From the Card Controls home screen, select **Set Declines and Alerts**, then:

- Select **Location Type**.
- Tap **Foreign Transactions** and flip the switch to the ON position. When you are ready to make a purchase abroad, simply switch to the OFF position.
